SCHUKO + 2 USB

Thanks to the new SCHUKO socket with double 2A USB charger, up to three devices (smartphones, tablets, cameras...) can be charged at the same time from a fixed point in the room.

This commitment to functionality is not at odds with design, as SKY NIESEN manages to provide an elegant and modern style through its multiple finishes.

CJC SYSTEMS

AEROTHERMAL

DAIKIN

DAIKIN

Daikin ALTHERMA 3 Supra RAVX1418DG fan heater, integrated design, 14 kW, 12040 cooling capacity, A+++ classification, COP 4.7, for heating, air conditioning and DHW, 180 storage tank, L consumption profile, R32 refrigerant gas.

POLYSCREEN 351

Polyscreen® 351 is a classic fabric from the Bandalux range, with an openness factor of 1%, which makes it one of our densest fabrics.

The inner and outer surface of the fabric are identical.

The new collection features warm colours with modern sand and grey tones, such as Cinder, Pebble and Slate.

The new range, which goes from cool to warm colours, is ideal for creating a private atmosphere. This fabric is suitable for customised digital printing solutions and for large windows.

The fabric provides energy savings for heating and air conditioning. In addition, it is highly resistant to extreme weather conditions (IMO), chlorine and easy to clean.

POLYTHERM

POLYTHERM

Polytherm underfloor heating is the system par excellence for the climatization of any room.

With specific systems according to the installation conditions and product and system certificates that guarantee optimum results and performance.

Investing in underfloor heating means providing every room with maximum comfort with exceptional savings through a long-lasting

climatization system and the only one on the market recommended by the WHO thanks to all the advantages it provides.

Ideal for installations looking for minimum energy consumption, environmental responsibility and absolute reliability.

HOME AUTOMATION

VITREA - VTOUCH PRO

Homes are now smarter, simpler and more affordable with **VTouch Pro**, the future of **home automation**. Due to its unique ability to easily replace **electrical switches**, VTouchPRO with its innovative use of wireless technology, delivers all the benefits of a home automation system without the need for expensive infrastructure, renovations or complicated wired installations.

With the **swipe of your finger**, you can control lights, blinds, set your security system or control your **HVAC** (ventilation, heating and AC) through our app on your mobile device.

In case your device doesn't work properly, or you simply prefer not to use it, you can control these functions of your home by touching the VTouch Pro **buttons** directly.

Now you can also **upgrade** your interior design with VTouch Pro's sleek glass touch switches, which give you the advantage of operating through a **central controller**.

ARANET takes home automation to the next level. ARANET, based on RF Mesh, creates a **virtual web** that connects each VTouch Pro push button. When the VBoxPro controller receives a request, the data moves through the network to the final switch, at ultra-fast speeds and with maximum reliability. **Easy to use** and intuitive, everyone can build their own lighting scenarios and control the inside/outside of their home.

In an **instant** and as often as you want, you can change your custom scenarios through simple software. Once **VTouch Pro** is installed, there is no need to rely on a service technician to reprogram your system or create new scenarios. VTouch Pro switches are **real switches**, not keypads.

They work 100% of the time and operate autonomously so you don't have to rely on an application or a master controller. This makes VTouch Pro the **most stable** and **reliable** in the home automation market.
